Thesis

- Study of the effect of autologous platelet-rich plasma (P.R.P) on the healing process of pilonidal wounds after excisional surgery
- Application of sentinel lymph node biopsy in patients with thyroid carcinoma

Books

- 2010** **Aliakbarian M, Soltani E.** Rewriting and translation of selected chapters of Sabiston textbook of surgery

Research Interests

- Transplantation
- Cancer Surgery
- Sentinel lymph node biopsy

Research projects (Scientific Projects/ Clinical Trials):

Completed

- Evaluation of function and complications of Uncut Roux esophagojejunostomy following total gastrectomy in patients referred to Imam Reza Hospital in the year 2006. Research Project No: 85126, Date of Approval: 08.30.2006.
- Study of influencing factors in seroma formation following mastectomy in breast cancer patients referred to Imam Reza Hospital during the year 2006. Research Project No: 85115, Date of Approval: 08.30.2006.
- Opioid abstinence induced perforation of the peptic ulcer; a comparison of the rate of postoperative complications related to perforated peptic ulcer among patients with history of abstinence therapy and non addicted patients (completed 88040)

Projects in process

- Study of the Validation of Sentinel Lymph Node Biopsy with Radionucleide Scan and Blue Dye in Gastric Cancer Surgery (Accept 88530)
- A Study of the Validation of Ex Vivo and in Vivo “Sentinel Lymph Node Biopsy” in Staging of Colon Cancers (Accept 88574)
- Comparison of lymphoscintigraphic drainage patterns before and after excisional biopsy of the breast lesions (Accept 88682)
- Evaluation of serum level of Prooxidant-Antioxidant Balance and CRP in patients with esophageal cancer and control groups (Accept 88312)
- Comparison between lymphoscintigraphy images using gamma camera with a high – energy collimator and a low – energy collimator in patients with low grade breast cancer (Accept 88673)
- Study the effect of autologous Platelet Rich Plasma (P.R.P) in treatment of pilonidal sinuses after excisional surgery and primary repair (In process)
- Evaluation of the effect of ascorbic acid administration on level of serum oxidative stress factors through the process of treatment of patients with hepatic hydatid cyst (In process)
- Role of ultrasound-guided core needle biopsy of axillary lymph nodes in prevention of unnecessary sentinel lymph node biopsy in early stage breast cancer (88542) (In process)

- Evaluation of the incidence of complications of lost stone during laparoscopic cholecystectomy (88794) (In process)
- Efficacy of laser coagulation treatment for high grade internal hemorrhoids (grade III & IV) (88845) (In process)
- Assessment of the therapeutic results of patients with appendicular mass and determination of factors that affect the therapeutic response in conservative approach(89007) (In process)
- Evaluation of the effect of ascorbic acid administration on level of serum oxidative stress factors through the process of treatment of patients with hepatic hydatid cyst (89351) (In process)
- Registry data bank of Lymphedema in Mashhad Vascular and Endovascular Research Center (89131) (In process)
